Dear Hiring Manager,

I am writing to express my keen interest in the Backend Developer position at your esteemed organization. With 1.5 years of hands-on experience in Python, Django, PostgreSQL, and Celery at Zemuria Inc., I am confident in my ability to contribute meaningfully to your development team and support your mission with robust, scalable solutions.

As a dedicated Backend Developer, I have consistently delivered impactful features and system improvements. Some key highlights from my experience include:

➢ Celery Integration: Developed a blog scheduling feature using Celery, enabling automated and timely content publishing.
➢ Role-Based Access System: Engineered a secure publication management system with token-based permissions to streamline editorial workflows.
➢ Performance Optimization: Diagnosed and resolved backend bottlenecks to significantly improve system efficiency.

Beyond technical skills, I bring strong problem-solving abilities and a proactive mindset. I have a deep understanding of OOP principles, asynchronous programming, and have worked with cloud platforms like AWS and GCP.

What sets me apart is my commitment to clean, maintainable code and my ability to rapidly adapt to new technologies. I'm excited about the opportunity to contribute to a forward-thinking team where I can apply my experience while continuing to grow.

Thank you for considering my application. I would welcome the opportunity to further discuss how my background aligns with your team's needs. Please feel free to reach out via email or phone to schedule a conversation.

Sincerely,

Subhiksha Astagirinathan
